XRoads Networks

Edge Network Appliance How To Guide:

Netsweeper Reporting Overview

The following are some of the reports generated by our Netsweeper content filtering solution. These reports can be generated on a daily, weekly, or monthly basis and can be automatically emailed to the network administrator.

Top Categories

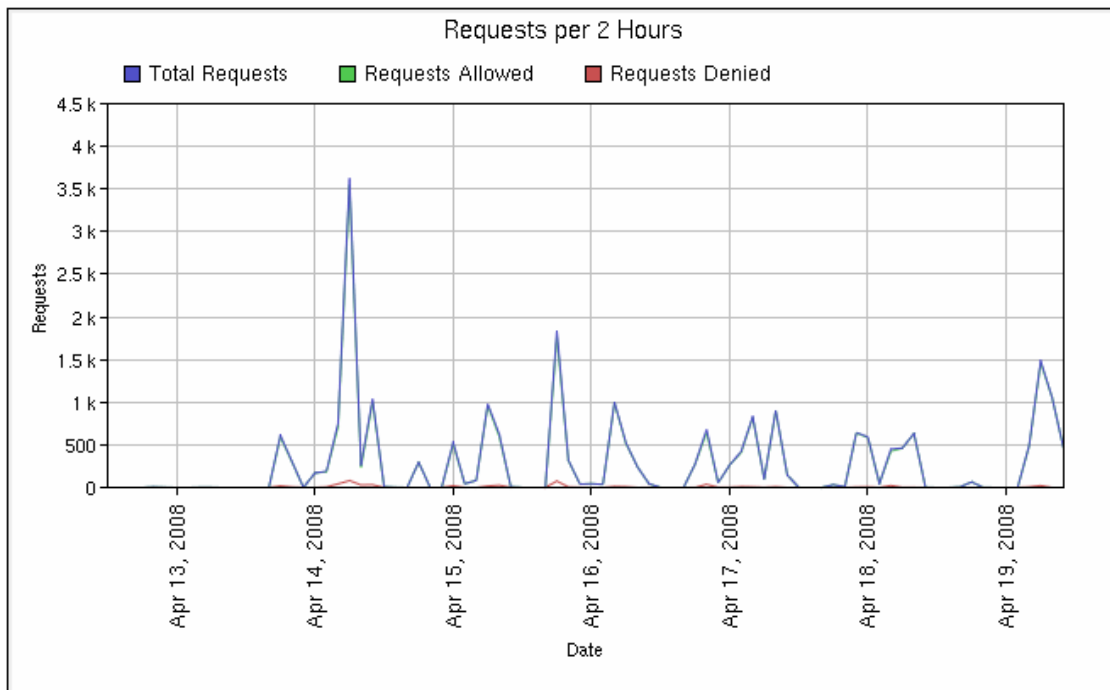

This graphs show the top websites accessed by end-users based on the category those websites were matched with.

Top Categories / Ordered

CATEGORY	TOTAL PAGES
Portals	3078
Search Engine	2481
General	1593
Adware	1449
Web E-mail	1135
Sales	838

Total	9164

This chart shows the top websites allowed by the Netsweeper search engine. If the engine is in bypass mode (i.e. not blocking sites, only monitoring) then this chart would show all websites accessed by end-users.

Top Websites Denied

This graph shows the top categories being blocked by the Netsweeper engine, as defined by the network administrator. These categories are setup via the Netsweeper web-based administrative console.

This chart show the top websites denied by the Netsweeper engine. These are the sites most often denied to end-users requesting access to these sites. Denied sites are denied based on the categories selected by the network administrator, or via blacklists of individual URLs which the network administrator may enter configure.
