

CORPORATE FACT SHEET

About XRoads Networks

XRoads Networks is the developer of Unified Bandwidth Management appliances which accelerate and ensure reliable application delivery. UBM solutions are designed to improve network control and provide the ability to manage bandwidth so that critical applications take precedence over other applications. As "cloud" computing has grown UBM naturally fits at the edge of customers' networks to ensure that critical applications get the bandwidth and reliability that they need.

Founded in 2001, XRoads Networks is a private company located in Irvine, California. Our products are integrated in to large Fortune 500 companies, as well as thousands of small to mid-sized organizations, educational facilities and government organizations around the world.

Value Proposition

- ✦ Improved Productivity through Optimized Application Delivery
- ✦ Reduced Effective Costs of WAN Connectivity through MultiWAN Capabilities
- ✦ Improved ROI by Ensuring Five Nines (99.999%) Uptime Guarantee for Applications

Technology

The XOS (XRoads Operating System) is a modular network operating system that provides a highly stable and secure base from which our development team has created the UBM platform. Our unique technologies include MSA (Multi-Session Acceleration), DBM (Dynamic Bandwidth Management), and S2S (MultiWAN Optimization via Site2Site Tunneling). XRoads Networks has several applied patents in this area and continues to invest in developing the XOS feature set.

Products

- UBM** The UBM product line appliances are full featured enterprise class solutions. They include all of the XOS modules and functionality, including MultiWAN application balancing, shaping, and optimization.
- aXcel** Designed for small to mid-sized organizations the aXcel product line is highly scalable and simple to deploy. Each aXcel appliance is specifically designed for the customers required functionality.
- Services** ZeroOutages is a service offered to ensure zero session loss for cloud-based applications. CLOUDaXcel is designed for data centers in order to increase throughput for server connectivity.

Distribution

XRoads Networks has deployed thousands of bandwidth management appliances in over 50 countries with hundreds of value added resellers representing our products and services. XRoads Networks has a global distribution channel covering the Americas, Asia, Europe, Africa and the Middle East.

Verticals

- ✦ MultiTenant - The MultiWAN aspects of the EdgeXOS platform are perfectly suited for growing networks, including hotels, office parks, and apartment buildings.
- ✦ Services /Retail Sector - The reliability capabilities of the EdgeXOS ensure connectivity for health care, financial, legal, and ecommerce businesses.
- ✦ Institutional/Government - The dynamic bandwidth control provided by the EdgeXOS ensures lower management costs for schools and government agencies.
