

**COMBINE UPLOAD & DOWNLOAD LINK SPEEDS (SYNCHRONOUS)**

Tunnel bonding combines link speeds between sites.

ISP A — ISP B

**VoIP CALLS PER DSL LINE**

Use "tunnel bonding" to increase the number of VoIP calls.

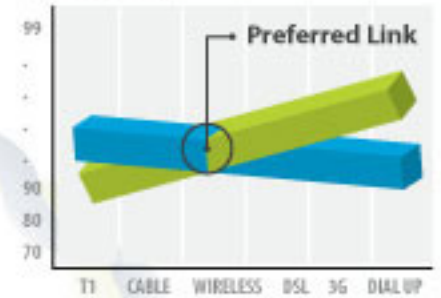

**SITE A**

Add speed and redundancy between offices in order to improve productivity.

**Site2Site™**  
VPN VIRTUALIZATION

**RELIABILITY VS UPLOAD SPEED PER LINE TYPE**

Select the best link type for Site2Site based on speed and redundancy.

ISP A — ISP B

**INSTANT FAILOVER PER TUNNEL**

One MPLS link averages nearly 24 hours of downtime per year.

**SITE B**

Replace MPLS with "tunnel bonding" using inexpensive broadband links.
